

ANNUAL REVIEW OF ANALYTICAL CHEMISTRY

JULY 2008 • [HTTP://ANCHEM.ANNUALREVIEWS.ORG](http://ANCHEM.ANNUALREVIEWS.ORG)

Co-Editors

Edward S. Yeung
Iowa State University

Richard N. Zare
Stanford University

Editorial Committee Members

R. Graham Cooks
Purdue University

Richard M. Crooks
University of Texas, Austin

Takehiko Kitamori
University of Tokyo

Laurie E. Locascio
*National Institute of
Standards and Technology*

Debra R. Rolison
Naval Research Laboratory

R. Mark Wightman
University of North Carolina, Chapel Hill

About the Annual Review of Analytical Chemistry

The *Annual Review of Analytical Chemistry*, publishing in 2008, aims to provide a perspective on the field of analytical chemistry. It will address measurement science in general, with a focus on concepts, materials, chemicals, and/or processes. The series will draw from disciplines as diverse as biology, physics, and engineering, with analytical chemistry as the unifying theme.

Some topics reviewed in the current volume include atmospheric analysis, atomic force microscopy, CARS imaging, electrochemistry on the nanoscale, nanoparticle sensors, on-chip multiplexing analysis, planetary and interstellar chemistry, nuclear magnetic resonance, mass spectrometry, microfluidics, biosensors, and chromatography.

This journal is ideal for readers with a general background in the natural sciences as well as a broad range of scientists interested in physical, chemical, and biological measurements.

The inaugural volume of the *Annual Review of Analytical Chemistry* will be available in print and online in July 2008. Individual reviews will publish online beginning January 2008.
